

SPECIALTY FABRICATION

Contact your MAFSI Representative for a custom quote

When form meets function in foodservice equipment, team members are more efficient, service is faster, and customers are happier.

That's the reason some of the largest quick-serve restaurant chains in the world trust Franke Specialty Fabrication to provide specific, cost-effective solutions for their unique equipment needs.

With our 'Tailor-Fit' fabrication capabilities, Franke designs and builds space-saving, ergonomic and customer friendly equipment that improves food preparation, holding, refrigeration, execution and productivity. And we've been doing it for more than 50 years.

Unmatched Experience

Franke has designed, equipped and installed more than 27,000 commercial kitchens worldwide. We bring that unmatched experience to every piece of specialty equipment we manufacture, install and support.

CREATIVE SOLUTIONS THAT IMPROVE YOUR OPERATIONS

Franke Specialty Fabrication designs and builds products with the specific size, shape, function and capability to improve operational efficiency and performance. Our specialty fabrication products include:

- Prep/Production Lines
- Heated Holding Cabinets and Landing Surfaces
- Fry Holding/Bagging Stations
- Specialty Refrigeration - Wall/Counter/Reach-In
- Self-Serve and Crew-Serve Beverage Stations
- Display Cases - Ambient/Heated/Refrigerated
- Exhaust Hoods
- Customized Tables, Carts, Stands, Sinks, Shelving, Smallwares and Utensils

FRANKE

The Franke Advantage

Most specialty equipment manufacturers are not trained or experienced in engineering creative solutions. Their expertise is limited to building the product based solely on the information and input their customers supply.

At Franke, we take a much different approach. We don't just 'take orders.' Instead, we become a partner with our customers, sharing our worldwide experience and in-depth expertise to develop new and innovative ideas that meet their specific needs and demands.

A Full-Service Approach

In addition to our global manufacturing resources, Franke brings to the table a broad range of other capabilities, from 'brainstorming' solutions to ongoing customer service and technical support. It's a comprehensive, full-service approach to specialty fabrication that few, if any, foodservice equipment manufacturers can match.

If needed, we can conduct extensive research and on-site observation to identify the specific need or problem. Our engineering and development team can brainstorm and conceive initial ideas and then design virtual prototypes. We can also build a physical prototype and field-test it to gain additional insight and information, if required. When testing is complete, Franke manufactures the product and can even oversee installation. And our capabilities don't stop there. We provide ongoing service and support through our 24/7/365 Call Center.

Images shown are examples of capabilities, talk to us about your specific needs.
